

DIY Bubble Solution

Ingredients:

2 cups water

$\frac{3}{4}$ cup dishwashing liquid

2 tablespoons vegetable glycerin

Optional: essential oil of choice

Instructions:

Pour water in a container, next add the dishwashing liquid and vegetable glycerin. If you want to add an essential oil to make “scented” bubbles just add a few drops at a time until it is as strong as you would like it. Gently stir until ingredients are combined. Label and store in an airtight container.
